TRUSTILE WOOD ENTRY SYSTEMS  
DESIGN THAT MOVES YOU<sup>™</sup>

See page B30 for product specs.

## THE TRUSTILE STORY

Since 1995, TruStile has put design at the center of our products and processes. From the materials we select to our exacting craft and design, we engineer for quality that sets the tone for the whole home. In collaboration with our parent company, Marvin™, we have created a family of premium entry systems that don't just transform a space, but how you feel inside it. Make the entry to your new home a most welcoming invitation with an exceptional entrance by TruStile.

Sidelite	DSG100
Wood Species	Mahogany
Finish	Ebony
Glass	White Lami

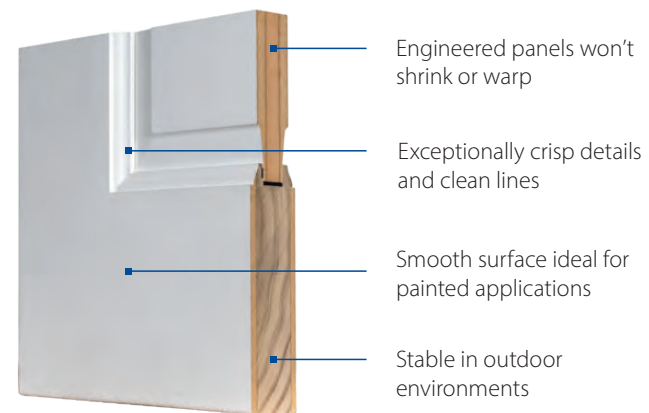

**Choose the Material  
Best Suited for Your Project**

Both material construction options have been extensively tested and proven in partnership with the Marvin™ Research and Development team.

**Resilient™** Wood Entry System

The Resilient Wood Entry System sets the tone of quality for the whole home using the most durable painted construction without sacrificing any design options.

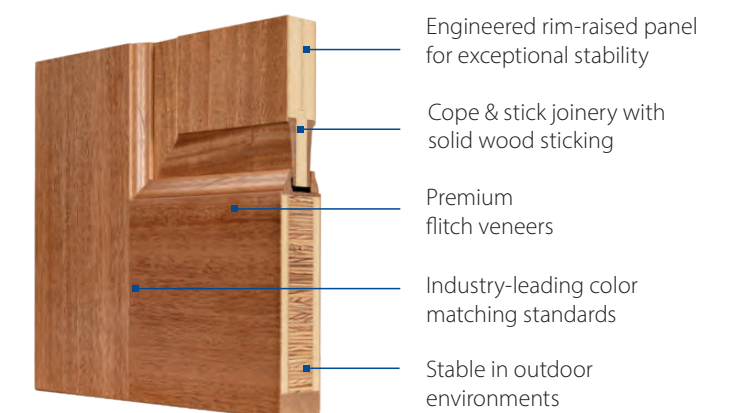

- Engineered with resilient Accoya®, an acetylated wood product, which brings unprecedented reliability and durability to wood.
- Tricoya® top layers provide exceptional stability, durability and paintability for outdoor applications.
- Most configurations delivered pre-hung with a premium prime finish that's ready to paint.
- 10-year warranty with limited and no overhang applications, depending on system design specifications.

**Reserve™** Wood Entry System

The Reserve Wood Entry System elevates the refined elegance of your home with the beauty of stained natural wood.

- 10 natural wood species available with an extensive collection of premium factory stain options.
- Premium appearance standards ensure industry-leading grain and color matching.
- Engineered with a laminated veneer lumber (LVL) core and Tricoya® layers for exceptional stability and durability.
- 5-year limited warranty with industry standard overhang requirements.

**TRUSTILE ENTRY SYSTEMS**

**TWO WAYS TO  
CREATE YOUR  
ENTRY SYSTEM**

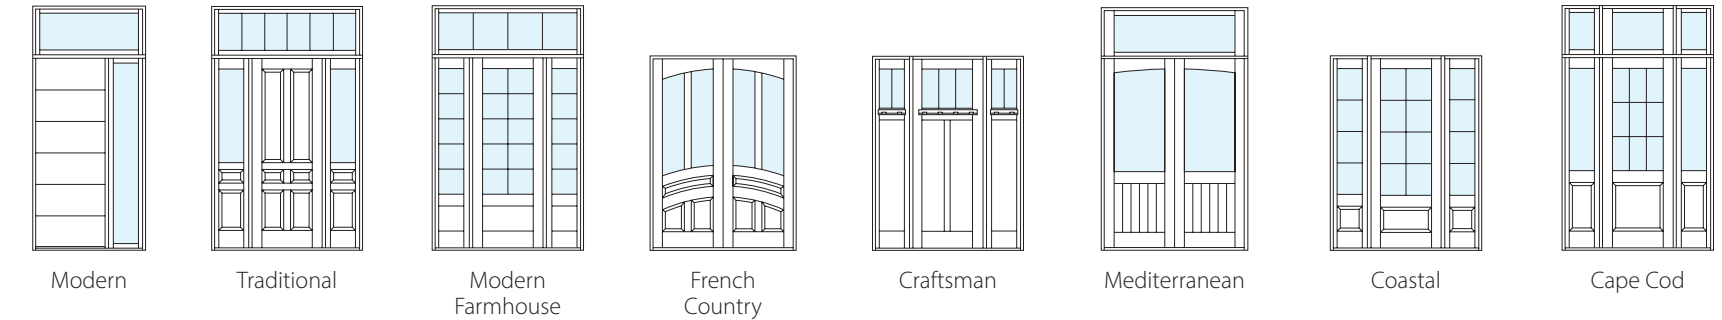

Start designing at  
[www.trustile.com/designtool](http://www.trustile.com/designtool)  
Details on page 88.

Select From Our  
Featured Entry  
Systems

We've created over 80 featured entry systems that capture the current trends of popular architectural styles. Start with the style most closely matching your vision for your home and tailor it to match your tastes and requirements.

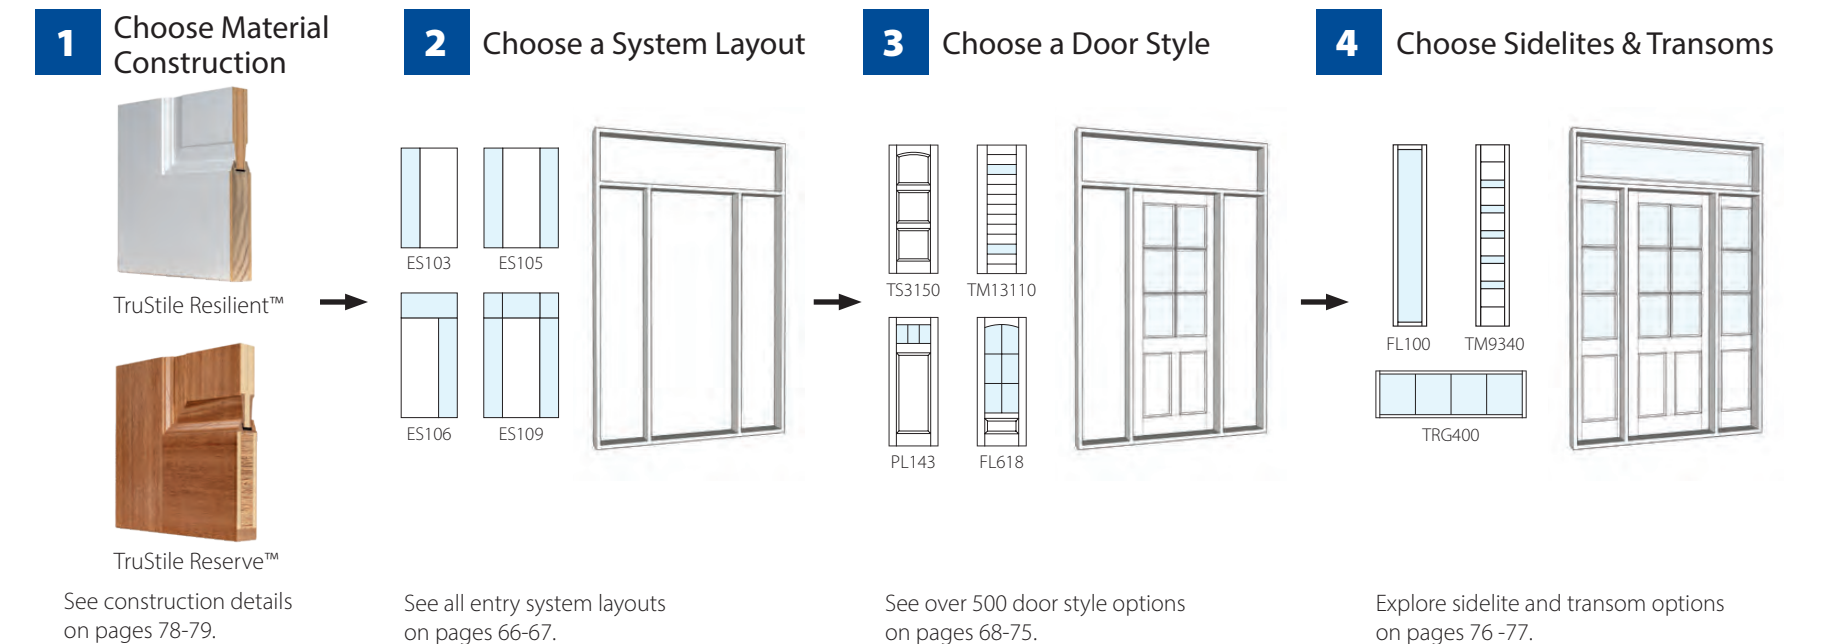

Select From Over 80 Featured Entry Systems

See all options in each architectural section starting on page 8.

Or Build Your Own  
Entry System

Design your custom entry system in a few simple steps. Choose the right material for your project. Select from over 500 door styles and endless design options. Then finalize the details to your exact specifications.

See construction details on pages 78-79.

See all entry system layouts on pages 66-67.

See over 500 door style options on pages 68-75.

Explore sidelite and transom options on pages 76-77.

IMPACTFUL  
SOPHISTICATED  
AUTHENTIC

TruStile has curated over 80 featured designs across eight architectural styles to make it easy to find the right look for your new entrance.

*\* Architectural category only. Impact and hurricane ratings not currently available. See your TruStile dealer to verify compatibility with your local building code.*

*Wood is a natural product and the finish and color will vary depending on the wood species and lighting on the job site. The images printed within this catalog are a representation of TruStile species and stain colors and do not replace seeing the stain and wood samples in person. Please visit your local TruStile dealer to request a factory finished stain sample.*

Available in 1- to 18-lites.

Available only for TruStile Reserve™

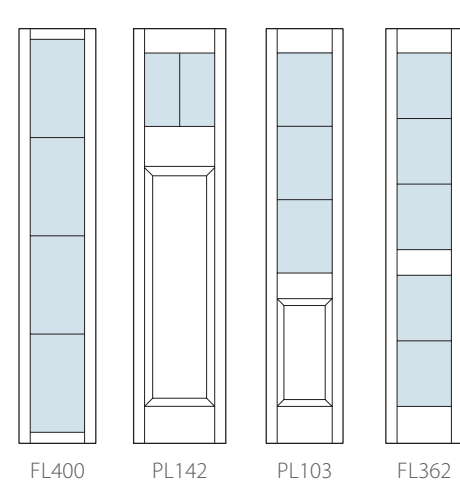

Maximize the amount of natural light available.

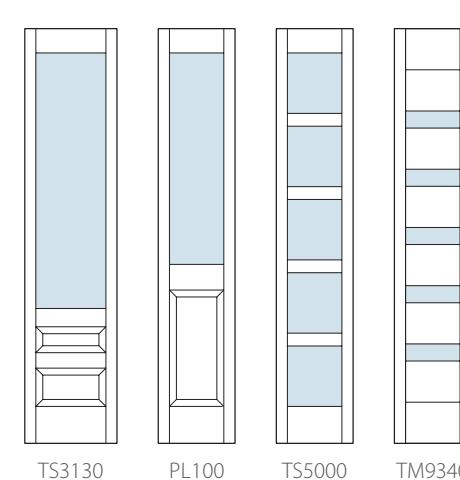

A one-lite in-sash sidelite is a classic look that brings natural light into your entrance.

*Order sidelites with stiles and rails as narrow as 1-7/8".*

We offer a wide selection of sidelites to complement your door style.

Many door styles are available as a matching sidelite.

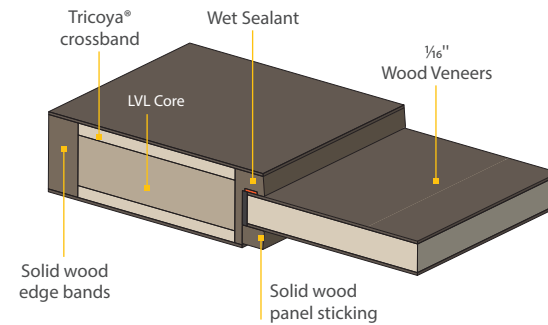

## Resilient™ and Reserve™ Wood Entry Systems Construction

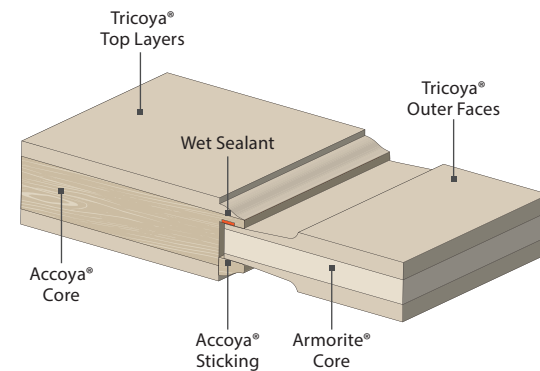

In collaboration with our parent company, Marvin™, we have engineered a family of premium entry systems that don't just transform a space, but how you feel inside it.

TruStile Entry Systems have been extensively tested and proven in partnership with the Marvin™ Research and Development team.

### Reserve™ Wood Entry System

### Resilient™ Wood Entry System

## Wood Performance Every Home Can Rely On

Learn more about the innovative, durable materials used in making our entry systems.

As the sister brand to Accoya®, Tricoya® is an acetylated wood panel product that achieves the same ultra-high levels of durability and stability in the most extreme and challenging climates and outdoor applications. Tricoya is used as a stable core material within the Reserve™ Wood Entry system and a durable, paintable surface layer of our Resilient™ Entry system.

- Doesn't shrink or swell like other wood products
- Superior paintability and consistent surface across the entire door
- Complies with CARB 93120 for No Added Formaldehyde

Accoya® is an acetylated, modified wood product that is unsurpassed when it comes to durability, stability and withstanding the test of any climate.

As part of the TruStile Resilient™ Entry System, Accoya® is used for the core and frame components for durability, stability, and superior rot resistance.

- Doesn't shrink or swell like other wood species
- 100% real wood. A sustainable and durable material
- Solid wood core provides superior screw holding on door edge

## So, What is Acetylation?

Acetylation is a process used to enhance the naturally-occurring properties of wood. In simple terms, it 'pickles' the wood, reducing how much water the cells in the wood can absorb.

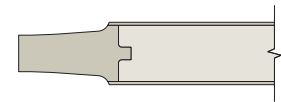

It does this without adding toxic chemicals to the final product, but by boosting the concentration of 'acetyl groups' — which are already found naturally in trees and their wood.

More specifically, the process uses acetic anhydride to change hydroxyl groups (which like water) into acetyl groups (which don't like water), resulting in improved performance characteristics without introducing harmful or environmentally unfriendly additives.

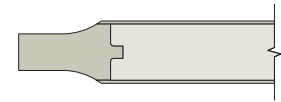

Altogether, this means the wood shrinks and swells much less when wet, and is much less susceptible to decay or insect attack. The finished product is highly durable and dimensionally stable, outperforming all known species of wood.

# Profile Options

## Panel Profiles

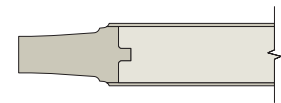

Raised (A) Panel

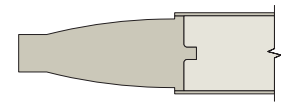

Scoop (B) Panel  
Also available with bladder-press panel

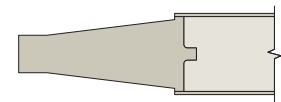

Flat (C) Panel

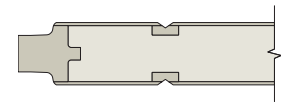

Double Hip (D) Panel

Senior Raised (E) Panel

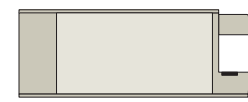

Senior Bevel (F) Panel

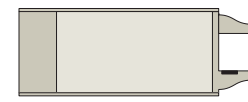

Standard V-Groove (VG) Panel

# Frame Profile and Mull Construction

All Reserve™ frame parts undergo a wood dip treatment to protect against fungus and insects. Resilient™ frames don't require dipping.

## FRAME OPTIONS

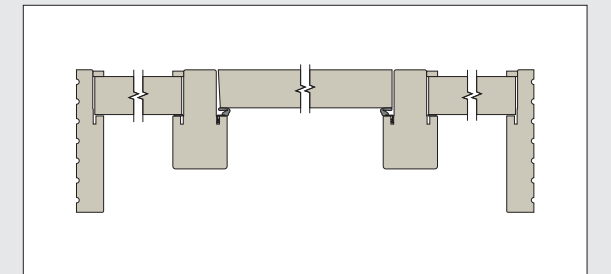

## UNIFRAME MULL POST OPTIONS

Single Rabbet Frame with Back-to-Back Mull Posts

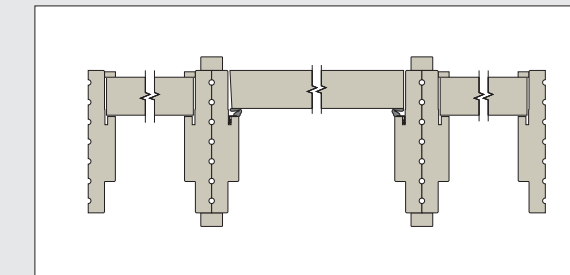

*Default for all door applications*

Single Rabbet Frame with 4 9/16" Uniframe Mull Posts

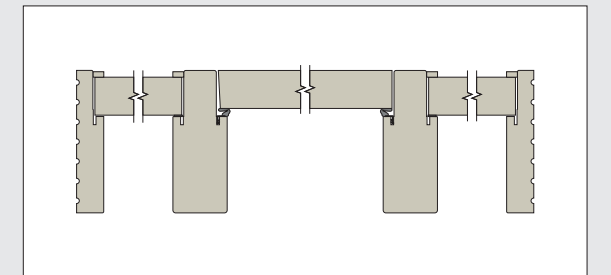

Double Rabbet Frame with Back-to-Back Mull Post

*Accommodates screen door applications*

Single Rabbet Frame with 6 3/16" Uniframe Mull Posts

Double Rabbet Frame, Uniframe, and Screen Doors are available in Reserve™ only

## Wood Species for Reserve™ Entry Systems

The Reserve™ Wood Entry System elevates the refined elegance of your home with the beauty of stained natural wood. Available in 10 natural wood species with an extensive collection of premium factory stain options.

Mahogany

Genuine Mahogany

Cherry

Douglas Fir (Vertical Grain)

Select Alder

Walnut

Plain Sawn White Oak

Quarter Sawn White Oak

Rift Sawn White Oak

Clear Pine

Paint-Grade Mahogany and Paint-Grade Douglas Fir not shown.

Consider the Resilient™ Wood Entry System for paint-grade applications.

## Stain Options

TruStile uses stains from ICA, a leading European finish manufacturer, for factory-finished entry systems. We begin by applying either a clear or tinted base stain with UV inhibitors (unfinished doors also get this base coat). Then a total of five coats of finish are applied. This includes two seal coats and three topcoat layers of finish giving a robust dry film finish thickness. Slight color and sheen differences might occur between interior and exterior finishes.

	Amaretto	Bleached	Cameo	Cappuccino	Caramel	Champagne	Cinnamon	Ebony	Espresso	Grey Mist	Hazelnut	Honey	Nutmeg	Slate	White Haze
Mahogany															
Cherry															
Clear Pine															
Douglas Fir															
Select Alder															
Walnut															
White Oak															

**For White Oak:** Choose rift sawn, plain sawn or quarter sawn. Plain sawn White Oak shown.

The color of the finish can vary depending on the color of the wood, lighting on the job site, and natural exposure to oxidation and sunlight. To get the best example of the stain color on a specific species, please visit your TruStile dealer.

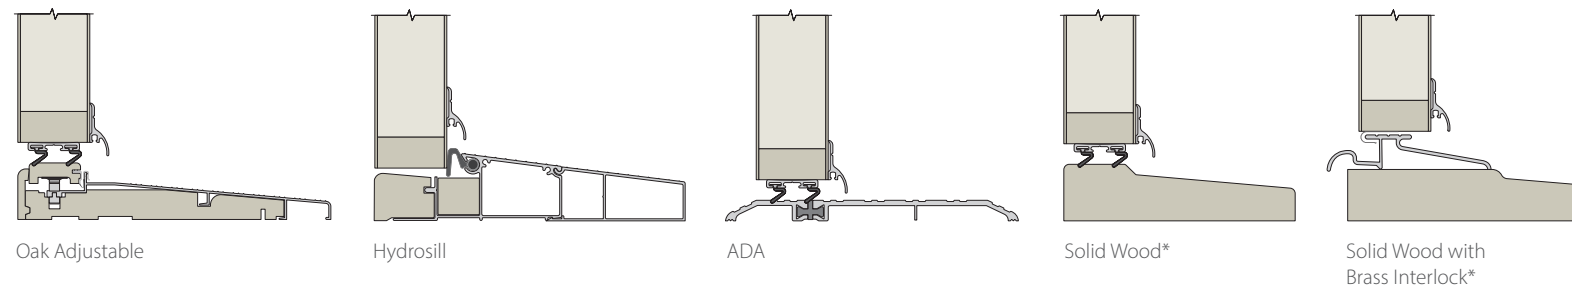

## Hinge Options

Choose from ten standard hinge finishes or select an option from Emtek® or Baldwin®.

## Sill Options

Choose from one of five standard sill options to complete your entry system.

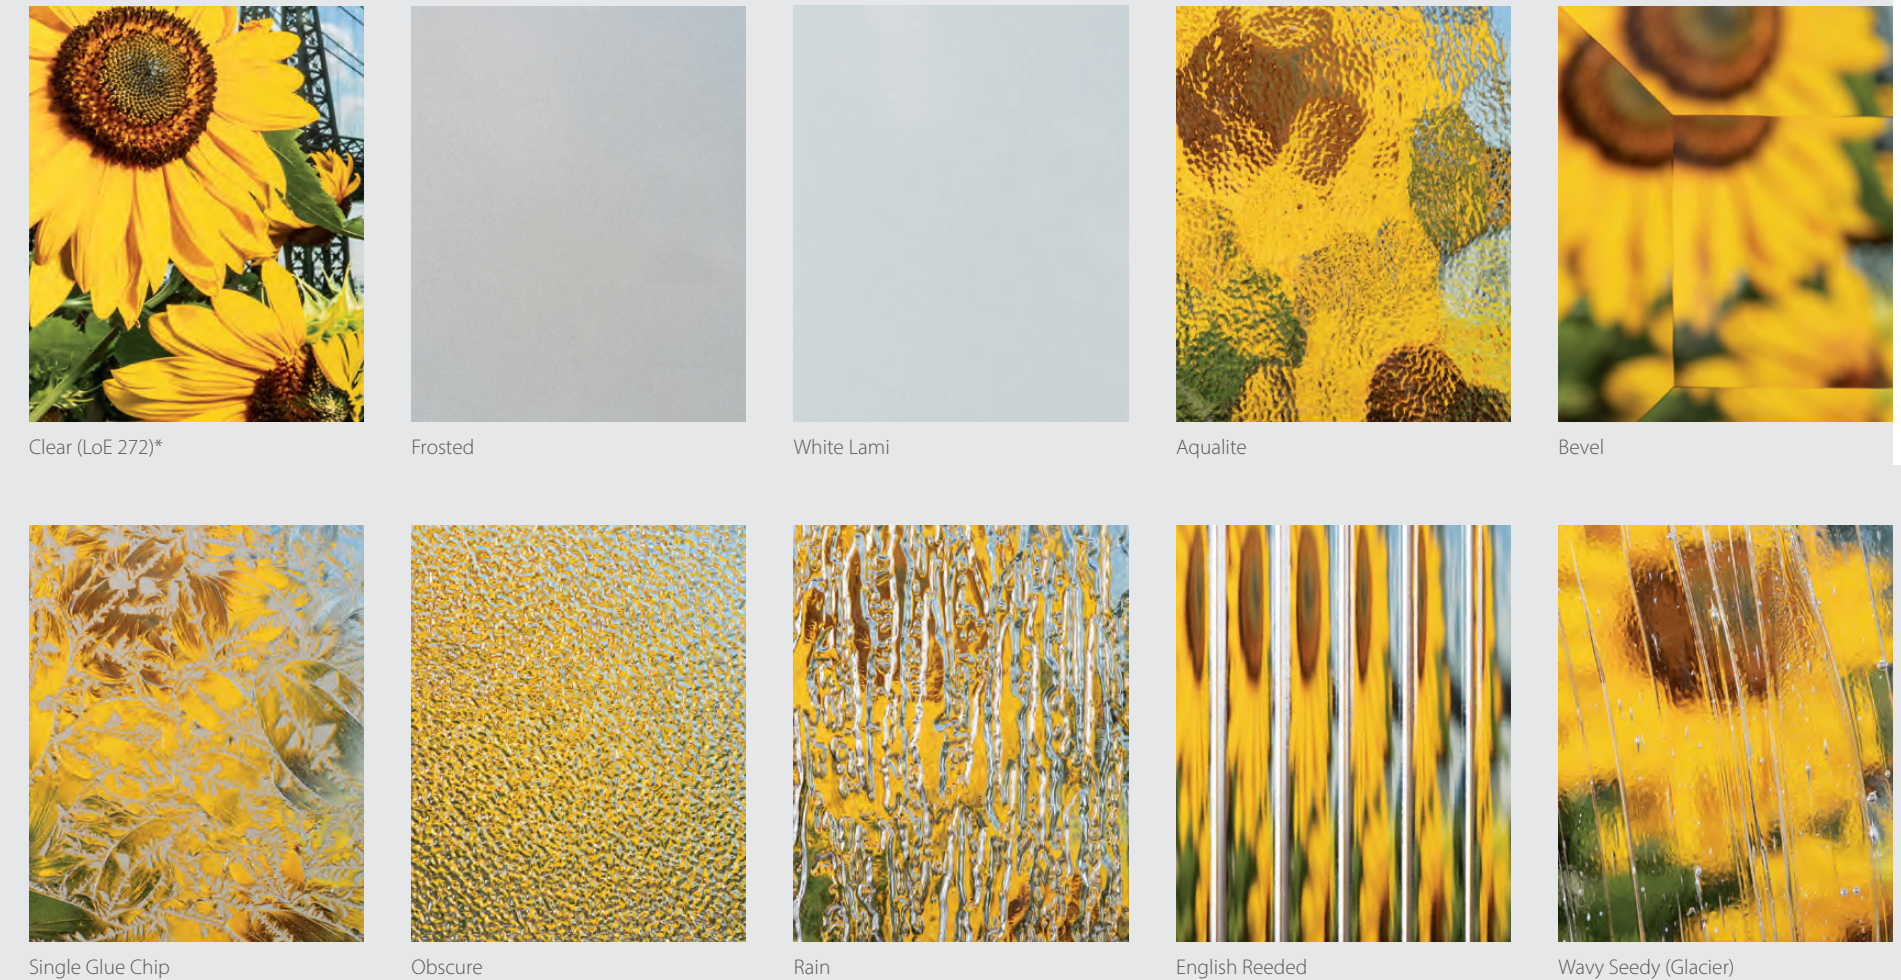

*\* Only available on TruStile Reserve™ Wood Entry Systems. Solid Wood Sills available in Genuine Mahogany and Plain Sawn White Oak.*

## Multipoint Lock Option

TruStile offers an automatic locking system from GU-Security which is required for certain warranty coverage. See website for details. [trustile.com/entry-systems/resources](http://trustile.com/entry-systems/resources)

## Insulated Glass Options

Complete your grand entrance with one of our many insulated glass options, including LoE and several decorative patterns.

*\* Clear glass also available as LoE 366, LoE 340, LoE 180, Low Iron and Clear Lami.*

\*\*Refer to page 87 for overhang requirements. \*\*\*Additional requirements may apply, please refer to TruStile warranty.

Note: Exterior doors not available for commercial projects.

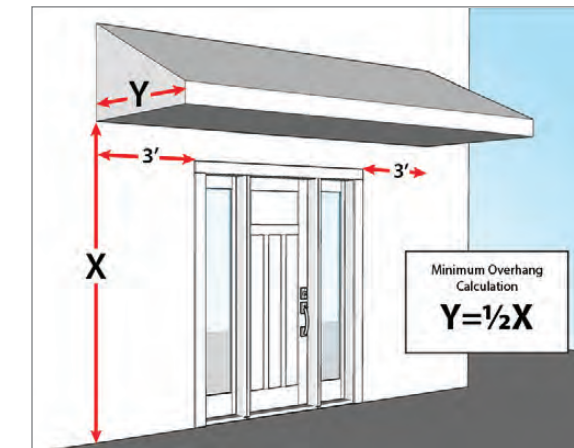

## Industry-Leading Warranty Coverage

TruStile Wood Entry Systems come backed with industry-leading warranty coverage. Door systems that are factory finished by TruStile are warranted to be free from manufacturing defects for 5 years from date of purchase for the Reserve™ Wood Entry System and 10 years from date of purchase for the Resilient™ Wood Entry System depending on application and specifications. Door systems purchased raw and unfinished are warranted to be free from manufacturing defects for 3 years from date of purchase. Due to its aging characteristics, Alder door systems are warranted for 1 year from date of purchase. Please see [trustile.com/warranties](http://trustile.com/warranties) for specific detail warranty information for each product.

## Requirements for Warranty Coverage

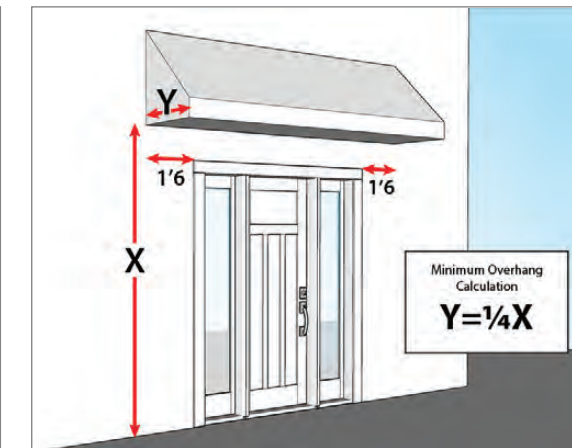

Your TruStile Entry Door should be viewed as a piece of well-engineered fine furniture. Careful steps have been taken to design the product to perform in proper exterior openings. However, finishes and natural wood both weather and break down over time. This weathering process increases with greater exposure to the elements. TruStile Wood Entry systems, like those sold by other manufacturers, require proper overhang protection to meet warranty requirements (see diagram below for details). Proper overhang helps to protect both the finish and the natural wood from moisture and UV damage. Even with proper overhang, the topcoat of any stained natural wood door must be inspected annually and reapplied during early signs of fading. Maintaining the topcoat will maximize the life of your natural wood door and is also required to maintain TruStile warranty coverage.

## Overhang Requirements

### Standard Overhang

Required for Reserve™ Wood Entry System warranty coverage

### Reduced Overhang

Required for warranty coverage on:

- Resilient™ Wood Entry System with sidelites and/or transoms
- Resilient™ single and pair units with oak adjustable sill
- Resilient™ pair units without multi-point locks

### No Overhang Required

Warranty coverage available for Resilient™ single and pair units meeting the following:

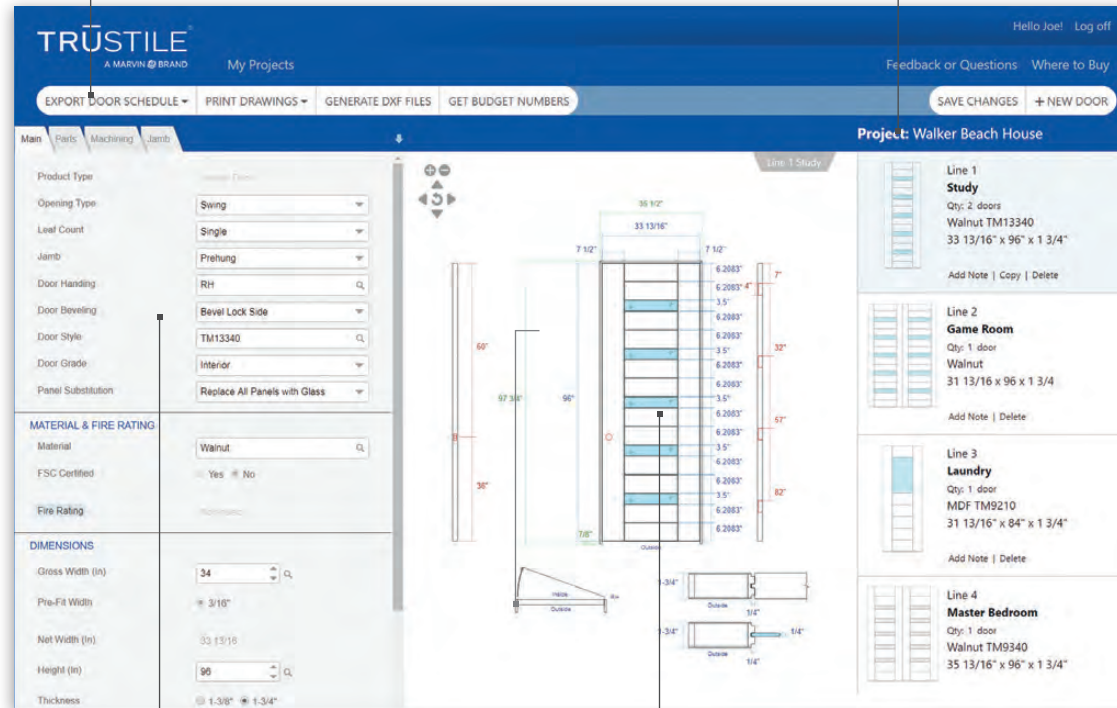

- Hydrosill™ required
- 3'6" x 8'0" maximum single door width
- 6'0" x 8'0" maximum pair width
- Multi-point lock required for no overhang coverage on pairs

# Door Design Tool

Configure multiple doors and organize them by project.

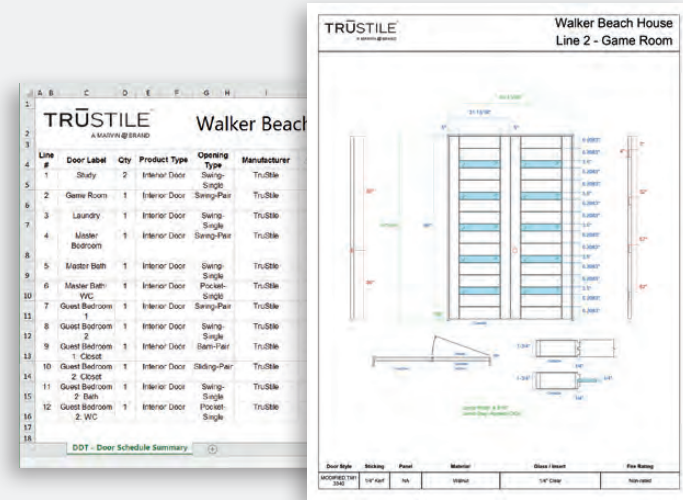

Export door schedules, drawings or CAD files to import into your plans

Create multiple doors and organize them by project

Over 500 door styles to customize to your needs — available as interior or exterior, pre-hung units or slabs.

An accurate preview is continually updated as you make changes to your door design.

## Share Your Project with Other Apps

Door Design Tool projects can be exported as a door schedule that opens directly in Microsoft® Excel, as a PDF of drawings or CAD models to import directly into your plans.
